

PRESS RELEASE

New LUCTRA® lamp puts the control in your hands

Iserlohn, Germany, 24. October 2023: DURABLE is expanding its range of LUCTRA® lamps with the new LUCTRA® TABLE LITE. This modern table variant is designed using insights from scientific research into the biological effect of light on the human body. The lamp is geared towards the individual needs of the user, providing tailored light wherever it is needed.

To achieve this, the light can be individually adjusted. So as well as being fully dimmable, users can vary the colour of the light according to their own personal daily rhythm. The LUCTRA® TABLE LITE is based

on the principles of human-centric lighting (HCL), ensuring better visual ergonomics and comfort at the desk.

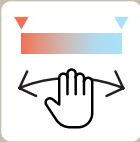

Its cutting-edge technology not only ensures the best possible light quality, but also meets the requirements.

Revolutionary gesture control

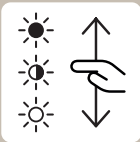

LUCTRA® is setting new benchmarks with its use of three-dimensional gesture control. Users can adjust and control the light simply by moving their hand beneath the lamp head. The integrated sensor turns these gestures into actions, such as turning the lamp on or off, or adjusting the brightness and light colour.

Turning on and off:
A wave of the hand in front of the sensor is all it takes to turn the lamp on and off..

Changing the light colour between cold and warm white:
Slowly moving the hand from left to right and vice versa adjusts the light colour. Each motion switches the light colour to the next gradient, choosing from a total of five settings. The colour temperature of the light varies from 2,700 K to 6,500 K.

Dimming:
Slowly moving the hand up and down inside the light beam dims the light.

Timeless, playful design

Made from aluminium, the refined, rounded design of the base, body and head gives the lamp a light and playful feel. This lets it fit seamlessly into almost any interior environment. The black design is inspired by current trends in office and home accessory style.

Thanks to the lightweight material, the LUCTRA® TABLE LITE requires only a small round base. This helps save space on the work surface.

User-friendly functions

The intuitive control is just one of the benefits that the LUCTRA® lamp delivers for everyday tasks.

The clever design continues in the power supply, which comes via an integrated USB-C socket. This universal plug format gives users maximum flexibility when using the lamp. As well as using the power supply unit, the LUCTRA® TABLE LITE can be connected directly to a laptop or powered via a power bank. As a result, users can work from truly anywhere.

About LUCTRA®:

LUCTRA® is the brand for good working light in the office or at home. For this purpose, the table, floor and mobile lamps included in the range provide light which not only illuminates, but also makes people happy, more efficient and simultaneously less tired. This works, because it transmits the right impulses for every situation.

To this end, the professional, biologically effective LED lamp system utilizes the latest scientific findings about the effect of light on human beings. It follows the principle of Human Centric Lighting, for short HCL, by focusing on human beings with their personal lighting needs for healthier and more efficient working and living. LUCTRA® light can almost perfectly simulate natural daylight and thus supports the user's personal inner clock.

LUCTRA® has already received numerous renowned design prizes such as the German Design Award and was brought to market in 2015 by the long-established company DURABLE Hunke & Jochheim GmbH & Co. KG. This company has been dedicated to professional work for more than a century: to its organisation, its processes and its equipment. DURABLE currently employs 700 workers worldwide and has its Head Office in Iserlohn/Germany. All LUCTRA® lamps are assembled manually by the expert staff of the LUCTRA® production plant in Kamen (North Rhine-Westphalia, Germany).
