

## PRESS RELEASE

### LUCTRA® TABLE LITE won the German Design Award 2024

**Iserlohn, 07.12.2023:** Following numerous awards for the LUCTRA® brand, the latest addition to the range - the LUCTRA® TABLE lamp has won another prestigious award. The German Design Council presented the award "Winner" in the Lighting category for excellent product design. The official presentation of the German Design Award will take place at the award ceremony on 26th January 2024 in Frankfurt.

"With its clear, minimalist design language, the elegant LUCTRA® LED table lamp emphasises a modern purist style of furnishing and promotes well-being through the realistic imitation of daylight" was the judges verdict. The new luminaire from LUCTRA® was officially presented in October of this year. LUCTRA® TABLE LITE sets new standards by combining the latest technical possibilities with timeless design.

#### High quality of light

The new table lamp utilises findings from research into the biological effect of light on people. It focuses on the individual needs of each user and provides customised light exactly where it is needed. The light can be individually adjusted for this purpose. In addition to infinitely varied dimming this includes varied control of the light colour according to personal daily rhythms. LUCTRA® TABLE LITE thus implements the Human Centric Lighting (HCL) approach and ensures greater visual ergonomics and visual comfort at the workplace.

The latest LED technology not only ensures the best quality of light, but also fulfils all the requirements of the HCL concept thanks to its particularly and bright illumination of the workplace (900 lm), it also fulfils the legal requirements.

#### move to LITE:

##### Light adjustment by gesture control

LUCTRA® sets new standards with three-dimensional gesture control. The light can be adjusted with simple hand movements below the luminaire head to adjust and regulated. The built-in sensor converts the movement into switching on and off, light colour and brightness.

### Timeless and yet particularly light design language

Made from aluminium, the table lamp has a particularly light and base, body and head, the aluminium table light and elegant. It fits into almost any room situation. The black colour scheme follows current trends in the design of accessories in the office and at home. All materials used emphasise the high-quality standards and are recyclable.

Thanks to its low weight the LUCTRA® TABLELITE only needs a small circular base. This saves space on the work surface.

### User-friendly functionality

The intuitive control system is a major advantage in the daily use of the LUCTRA® light. The power supply via an in-built USB-C connection is also well thought-out and contemporary. The universal connector format enables maximum flexibility when using the luminaire. In addition to using the power supply unit, there are other options: LUCTRA® TABLE LITE can be connected directly to a laptop or powered by a power bank. There are virtually no limits to the choice of work location.

"With the TABLE LITE, we have combined the latest technical possibilities and best lighting quality in a particularly filigree design. Winning the German Design Award is confirmation for us that we have succeeded. We are delighted to have won," says Anna Kondakis, Marketing Manager New Work Solutions.

**About LUCTRA®:**

About LUCTRA®: LUCTRA® is the brand for good working light in the office or at home. For this purpose, the table, floor and mobile lamps included in the range provide light which not only illuminates, but also makes people happy, more efficient and simultaneously less tired. This works, because it transmits the right impulses for every situation.

To this end, the professional, biologically effective LED lamp system utilizes the latest scientific findings about the effect of light on human beings. It follows the principle of Human Centric Lighting, for short HCL, by focusing on human beings with their personal lighting needs for healthier and more efficient working and living. LUCTRA® light can almost perfectly simulate natural daylight and thus supports the user's personal inner clock.

LUCTRA® has already received numerous renowned design prizes such as the German Design Award and was brought to market in 2015 by the long-established company DURABLE Hunke & Jochheim GmbH & Co. KG. This company has been dedicated to professional work for more than a century: to its organisation, its processes and its equipment.
